

For all new students/parents/guardians,

Congratulations and welcome! Our staff at Student Health Services works hard to promote **Healthy Hounds** and here's our hit list of the top things you need to know about us.

Hhealth form completion

Complete the Health Form, including required immunizations, by the designated deadline.

Every student must have health insurance

Enroll in the school-sponsored insurance plan, or waive it if your family's insurance meets our waiver criteria. You will be asked for your insurance card when you are seen at the health center.

Appointments are free

However, there are charges for any testing that we do or medications we dispense in the health center.

Look at our website

www.loyola.edu/studenthealth You can find our links to social media there as well!

The flu shot

GET IT! Best time to get it is September/October to cover you through the fall and spring semesters.

Help is always available

Even when we are closed, there is a physician on-call anytime we are not open.
