This month’s newsletter features highlights from the 2019 Grand Seminar, upcoming events and opportunities including seminars, conferences, the STEM Career Fair and more. If you have news or photos to submit for a future issue, please email Jen Sullivan. We are excited to share all that is happening in the sciences!

2019 Grand Seminar Recap

Thank you to all who attended Grand Seminar on Thursday, September 26. The spotlight annual event hosting by Natural and Applied Sciences featured keynote speaker Elodie Ghedin, Ph.D., a global public health biologist and researcher from NYU who presented “(Microbial) Networking Going Viral.” Prior to the seminar, guests attended a reception showcasing research posters by the 2019 Hauber Summer Research fellows. During the reception, Bahram Roughani, associate dean for Natural and Applied Sciences, and Stephen Fowl, dean for Loyola College of Arts and Sciences, presented an award to distinguished alumnus Michael Hinkey, ’80, retired VP and general manager of Airborne C4ISR Systems at Northrop Grumman, for his mentorship and support of NAS programs. Mr. Hinkey is an active member of the Natural and Applied Sciences Steering Board whose generous philanthropy has supported science students with scholarships.

Community members including a group of students from Mercy High School attended the reception and seminar.
Upcoming Events
