LEADERSHIP ESSENTIALS

Explore your Leadership Skills with Leadership Essentials!

Designed specifically for emerging leaders with increasing leadership responsibilities, Leadership Essentials is a unique, multifaceted program that combines skill-building and personalized coaching. It is a six-month, tuition-based continuing education program offered by Loyola University Maryland’s Center for Continuing Education in partnership with Leadership Howard County and in collaboration with other organizations throughout the greater Baltimore region. Each cohort consists of 20-25 individuals of varied backgrounds, education levels, and professions. Participants learn about their own leadership abilities and from one another through three core components:

- **Skills-based workshops**: In-depth explorations of leadership topics that provide participants with the opportunity to learn new leadership skills. Sessions are facilitated by leaders from the community for the full cohort.

- **One-on-one leadership coaching**: Participants engage with a leadership coach, meeting twice monthly during the program to explore and reflect on their leadership journey and create an action plan.

- **Community service projects**: Participants work as part of a team in service to an area nonprofit organization; a practical learning lab experience for the learnings of the LE program.

Program plans for LE 2021 will be announced mid-July. These will include consideration of unknowns related to the continuing Covid-19 precautions, with flexibility and virtual adaptability integrated as circumstances require.
