

How to use technology to support interactive teaching: Modeling pedagogy appropriate for all age-levels

Working with future elementary school teachers, I recognize and appreciate the pressure of modeling good practice for them as they prepare to work in their future classrooms. If I cannot get ALL students actively engaged in the classroom discussions and activities, then I have failed as a model.

Technology offers us many ways to interact with students both in the classroom and virtually. It also gives us opportunities to make sure all students are contributing as both learners and leaders.
